

## Come see the latest from industry innovator ECD at Productronica 2017!

At next week's global electronics event in Munich, ECD will unveil a brand new technology that raises the bar on process monitoring, analysis and control. Completely customizable and scalable, OvenSENTINEL™ will make its debut at Productronica and offers assembly specialists massive benefits such as:

- Dynamic, adaptable measurement capabilities
- Industry 4.0+ technology
- Hands-off, automated thermal profiling
- Full-featured traceability and process verification
- Continuous quality monitoring for consistently high yields

OvenSENTINEL. Beyond Smart...it's Genius.™

Visit the ECD team in in Hall A4, Booth 532 to learn more about OvenSENTINEL, our full portfolio of award-winning M.O.L.E.® thermal profilers, and wave and reflow process test pallets.
