

SmartDRY – Remodeled for 2018!

ECD's SmartDRY™ Intelligent Dry Storage system has set a new standard for compliant storage of moisture-sensitive devices....but we never stop improving on a great thing! We've listened to your input, studied industry roadmaps and have integrated several enhancements to the SmartDRY portfolio.

In addition to its insanely fast recovery time (<3 minutes), unique status lighting and Industry 4.0 capability, new SmartDRY units will now deliver:

- **Simplified security** – optional secure keyless entry functionality eliminates worry about lost keys or non-authorized access.
- **Intuitive Control** --- 4.1" full color HD touch screen display makes controlling SmartDRY easier than ever before.
- **Large Item Compatibility** – Redesigned, taller doors on the SmartDRY SD-30 and SmartDRY SD-48 models are now an option to facilitate easy accessibility for feeder trays and allow component reels to stay married to their feeders for traceability compliance.

Visit ECD at APEX in booth #1036 and see the new SmartDRY, as well as our award-winning M.O.L.E. products and latest innovation, OvenSENTINEL.
