

## It's Summer. Are your components sweating?

It's hot out there. Don't let your moisture-sensitive devices (MSDs) suffer through the heat and humidity. Get [SmartDRY Intelligent Dry Storage](#) and your MSDs will be the coolest components in the industry! ECD's SmartDRY is the high IQ, cost-effective dry storage solution you've been looking for.

With innovative features like...

- **Industry 4.0 Capability** – Built-in networking technology provides 24/7 data access from any connected or mobile device.
- **Status on Sight** – Unique interior lighting and optional light tower indicate readiness at a glance for confident parts retrieval.
- **Frequent Parts Access** – Ultra-fast recovery of less than 3 minutes allows access to components as many as 10-12 times per hour without compromising J-STD-033 compliance.
- **Rugged Construction** – Made to last, SmartDRY is built for longevity and performance and designed and constructed in the USA.

...SmartDRY makes compliance easy, parts access frequent, connectivity a given and affordability certain.

Don't sweat the small stuff, learn more about SmartDRY today!
